4. PART D – Scientific Research (Please attach the following information to your application):

Project proposal:

Clearly outline the research objectives and methodology that will be used in your project. Be as specific as possible. If capture is involved, outline methods (eg. length of activity, gear used etc) and how you will stress levels to affected species. If biological sample collection or other invasive activities (eg surgery) are part of the permit request, you must also provide sufficient detail on methodology and indicate efforts to reduce wildlife pain or stress.

Project Location:

Identify the specific location(s) of your field work, including co-ordinates (latitude/longitude). If large areas will be covered, provide a map summary of locations included in your study. If appropriate, identify which special or protected lands you plan to work in (e.g., MPAs, seamount etc.). If your project is to occur in an area of high species interaction, please indicate.

Personal Experience:

Outline your previous experience in relation to the proposed activities and capture/handling of wildlife. If other persons may be involved with this project (e.g., field assistant), also list their names and previous experience in relation to the proposed project.
